Customer Information

1a. TABLE OF AWARDED SPECIAL ITEM NUMBERS (SINs)

Awarded SIN	Description
518210C	Cloud and Cloud-Related IT Professional Services *(legacy SIN 132-40)*
54151ECOM	Electronic Commerce and Subscription Services *(legacy SIN 132-52)*
54151S	Information Technology (IT) Professional Services *(legacy SIN 132-51)**
611420	Information Technology Training *(legacy SIN 132-50)**
OLM	Order Level Materials

**** Note: All items offered under SIN 54151S (IT Professional Services) and SIN 611420 (IT Training) are incidental to, in conjunction with and in direct support of the products sold under SIN 518210C and SIN 54151ECOM and cannot be purchased separately.***

1b. LOWEST PRICE MODEL NUMBER AND LOWEST UNIT PRICE FOR EACH SIN

MFG / Family	MFG Part No.	Description	GSA Price	GSA SIN
Akamai / Shared Services	100-1000.208	Guest Social Event Pass (to either the welcome reception or liquid party)	$30.00	611420
Akamai / Service & Support	SVM2-PSH-15-001	Service Management Package 2.0: PS Hours (Overage rates after using allowed amounts): Quarterly, 0 - 999,999,999	$241.80	54151S
Akamai / Shared Services	100-1000.215	Generic Service Management (6 hours/month or 18 hours/quarter)	$241.80	54151S
Akamai / GTM - Standard	GTM-PRP-15-001	GTM/ Web Performance - Standard: Additional Properties 2 Property Plan, Properties Monthly	$241.80	54151ECOM
Akamai / OD	OD-MBC-15-006	Object Delivery Mbps - Commitment: Monthly, 1501 to 3000 Mbps	$241.80	54151ECOM
Akamai / OD	OD-MBO-15-006	Object Delivery Mbps - Overage: As Incurred, 1501 to 3000 Mbps	$241.80	54151ECOM
Akamai / Shared Services	100-1000-140.002	Overage – Additional properties > 2 Properties (Per Property)	$241.80	54151ECOM

2. MAXIMUM ORDER

Maximum Order Level for SINs 518210C, 54151ECOM, and 54151S is $ 500,000.00
Maximum Order Level for SIN 611420 is $250,000.00
Cumulative value of SIN OLM in an individual task or delivery order cannot exceed 33.33% of the total value of the order.

3. MINIMUM ORDER

Minimum Order for all SINs is $ 100.00

4. GEOGRAPHIC COVERAGE (Delivery Area)

The geographic scope of this contract is the 48 contiguous states, Alaska, Hawaii, Puerto Rico, Washington DC, and U.S. Territories.

5. POINT(S) OF PRODUCTION (City, County, and State or foreign country)

Cambridge, MA USA

6. DISCOUNT FROM LIST PRICES OR STATEMENT OF NET PRICE

Prices shown are Net prices (basic discounts have been deducted), inclusive of the GSA Industrial Funding Fee (IFF) of .75%.

7. QUANTITY DISCOUNTS

None.

8. PROMPT PAYMENT TERMS

Standard terms are Net 30 days from receipt of invoice or date of acceptance, whichever is later.
Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9. FOREIGN ITEMS (List items by country of origin)

Not applicable. All items are US-origin.

10a. TIME OF DELIVERY (Contractor Insert Number of Days)

Special Item Numbers (SINs) 518210C, 54151ECOM, 54151S, 611420 and OLM - As negotiated with the Ordering Agency at the Task Order level or 30 calendar days ARO.

10b. EXPEDITED DELIVERY

Not available/ Not applicable.

10c. OVERNIGHT AND 2-day delivery
Not available/ Not applicable.

10d. URGENT REQUIREMENTS
Agencies may contact the Contractor for the purpose of obtaining an accelerated delivery.

11. F.O.B. POINT(s)
Destination

12a. ORDERING ADDRESS(es)
Akamai Technologies, Inc.
145 Broadway
Cambridge, MA 02142-1054

Akamai Technologies, Inc.
11111 Sunset Hills Road, Suite 250
Reston, VA 20190-5374

12b. ORDERING PROCEDURES
For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.
Ordering activities shall use the ordering procedures of Federal Acquisition Regulation (FAR) 8.405 when placing an order or establishing a BPA for supplies or services.
These procedures apply to all schedules.
a. FAR 8.405-1 Ordering procedures for supplies, and services not requiring a statement of work.
b. FAR 8.405-2 Ordering procedures for services requiring a statement of work.

13. PAYMENT ADDRESS
Akamai Technologies, Inc.
Accounts Receivable
General Post Office, PO Box 2659
New York, NY 10087-6590

14. WARRANTY PROVISION
Standard Commercial Warranty.

15. EXPORT PACKING CHARGES, IF APPLICABLE
Not applicable.

16. TERMS AND CONDITIONS OF RENTAL, MAINTENANCE, AND REPAIR (if applicable)
Not applicable.

17. TERMS AND CONDITIONS OF INSTALLATION (if applicable)
Not applicable.

18. TERMS AND CONDITIONS OF REPAIR PARTS (If applicable)
Not applicable.

19. LIST OF SERVICE AND DISTRIBUTION POINTS (If applicable)
Not applicable.

20. LIST OF PARTICIPATING DEALERS (If applicable)
Not applicable.

21. PREVENTIVE MAINTENANCE (If applicable)

Not applicable.

22. SPECIAL ATTRIBUTES SUCH AS ENVIRONMENTAL ATTRIBUTES (e.g., recycled content, energy efficiency, and/or reduced pollutants)

Leading the internet revolution for more than 20 years, Akamai is proud to take a leadership role in minimizing the environmental impact of information technology systems. The **Akamai Sustainability Initiative** strives to measure and mitigate the impact of our business operations, while maximizing and enhancing the benefits from sustainable business practices. Details on Akamai's sustainable programs focusing on network efficiency, electronic waste management and LEED® certified offices is available at https://www.akamai.com/us/en/about/corporate-responsibility/sustainability/

23. DATA UNIVERSAL NUMBER SYSTEM (DUNS) NUMBER

47775205

24. NOTIFICATION REGARDING REGISTRATION IN CENTRAL CONTRACTOR REGISTRATION (CCR) DATABASE

Contractor maintains an active registration with the Central Contractor Registration Database (CCR) available at *https://www.SAM.gov*.

TERMS AND CONDITIONS APPLICABLE TO CLOUD COMPUTING SERVICES (SPECIAL IDENTIFICATION NUMBER 518210C)

1. SCOPE

The prices, terms and conditions stated under Special Item Number (SIN) 518210C Cloud Computing Services apply exclusively to Cloud Computing Services within the scope of this Information

This SIN provides ordering activities with access to technical services that run in cloud environments and meet the NIST Definition of Cloud Computing Essential Characteristics. Services relating to or impinging on cloud that do not meet all NIST essential characteristics should be listed in other SINs.

The scope of this SIN is limited to cloud capabilities provided entirely as a service. Hardware, software and other artifacts supporting the physical construction of a private or other cloud are out of scope for this SIN. Currently, an Ordering Activity can procure the hardware and software needed to build on premise cloud functionality, through combining different services on other IT Schedule 70 SINs (e.g. 54151S).

Sub-categories in scope for this SIN are the three NIST Service Models: Software as a Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS). Offerors may optionally select a single sub-category that best fits a proposed cloud service offering. Only one sub-category may be selected per each proposed cloud service offering. Offerors may elect to submit multiple cloud service offerings, each with its own single sub-category. The selection of one of three sub-categories does not prevent Offerors from competing for orders under the other two sub-categories.

See service model guidance for advice on sub-category selection.

Sub-category selection within this SIN is optional for any individual cloud service offering, and new cloud computing technologies that do not align with the aforementioned three sub-categories may be included without a sub-category selection so long as they comply with the essential characteristics of cloud computing as outlined by NIST.

See Table 1 for a representation of the scope and sub-categories.

Table 1: Cloud Computing Services SIN

• Commercially available cloud computing services	**1. Software as a Service (SaaS):** Consumer uses provider's applications on cloud infrastructure. Does not manage/control platform or infrastructure. Limited application level configuration may be available.
• Meets the National Institute for Standards and Technology (NIST) definition of Cloud Computing essential characteristics	**2. Platform as a Service (PaaS):** Consumer deploys applications onto cloud platform service using provider-supplied tools. Has control over deployed applications and some limited platform configuration but does not manage the platform or infrastructure.
• Open to all deployment models (private, public, community or hybrid), vendors specify deployment models	**3. Infrastructure as a Service (IaaS):** Consumer provisions computing resources. Has control over OS, storage, platform, deployed applications and some limited infrastructure configuration, but does not manage the infrastructure.

2. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character.

a. Acceptance Testing

Any required Acceptance Test Plans and Procedures shall be negotiated by the Ordering Activity at task order level. The Contractor shall perform acceptance testing of the systems for Ordering Activity approval in accordance with the approved test procedures.

b. Training

If training is provided commercially the Contractor shall provide normal commercial installation, operation, maintenance, and engineering interface training on the system. Contractor is responsible for indicating if there are separate training charges.

c. Information Assurance/Security Requirements

The contractor shall meet information assurance/security requirements in accordance with the Ordering Activity requirements at the Task Order level.

d. Related Professional Services

The Contractor is responsible for working with the Ordering Activity to identify related professional services and any other services available on other SINs that may be associated with deploying a complete cloud solution. Any additional substantial and ongoing professional services related to the offering such as integration, migration, and other cloud professional services are out of scope for this SIN.

e. Performance of Cloud Computing Services

The Contractor shall respond to Ordering Activity requirements at the Task Order level with proposed capabilities to Ordering Activity performance specifications or indicate that only standard specifications are offered. In all cases the Contractor shall clearly indicate standard service levels, performance and scale capabilities.

The Contractor shall provide appropriate cloud computing services on the date and to the extent and scope agreed to by the Contractor and the Ordering Activity.

f. Reporting

The Contractor shall respond to Ordering Activity requirements and specify general reporting capabilities available for the Ordering Activity to verify performance, cost and availability.

In accordance with commercial practices, the Contractor may furnish the Ordering Activity/user with a monthly summary Ordering Activity report.

3. RESPONSIBILITIES OF THE ORDERING ACTIVITY

The Ordering Activity is responsible for indicating the cloud computing services requirements unique to the Ordering Activity. Additional requirements should not contradict existing SIN or IT Schedule 70 Terms and Conditions. Ordering Activities should include (as applicable) Terms & Conditions to address Pricing, Security, Data Ownership, Geographic Restrictions, Privacy, SLAs, etc.

Cloud services typically operate under a shared responsibility model, with some responsibilities assigned to the Cloud Service Provider (CSP), some assigned to the Ordering Activity, and others shared between the two. The distribution of responsibilities will vary between providers and across service models.

Ordering activities should engage with CSPs to fully understand and evaluate the shared responsibility model proposed. Federal Risk and Authorization Management Program (FedRAMP) documentation will be helpful regarding the security aspects of shared responsibilities, but operational aspects may require additional discussion with the provider.

a. Ordering Activity Information Assurance/Security Requirements Guidance

i. The Ordering Activity is responsible for ensuring to the maximum extent practicable that each requirement issued is in compliance with the Federal Information Security Management Act (FISMA) as applicable.

ii. The Ordering Activity shall assign a required impact level for confidentiality, integrity and availability (CIA) prior to issuing the initial statement of work.[2] The Contractor must be capable of meeting at least the minimum security requirements assigned against a low-impact information system in each CIA assessment area (per FIPS 200) and must detail the FISMA capabilities of the system in each of CIA assessment area.

iii. Agency level FISMA certification, accreditation, and evaluation activities are the responsibility of the Ordering Activity. The Ordering Activity reserves the right to independently evaluate, audit, and verify the FISMA compliance for any proposed or awarded Cloud Computing Services.

iv. The Ordering Activity has final responsibility for assessing the FedRAMP status of the service, complying with and making a risk-based decision to grant an Authorization to Operate (ATO) for the cloud computing service, and continuous monitoring. A memorandum issued by the Office of Management and Budget (OMB) on Dec 8, 2011 outlines the responsibilities of Executive departments and agencies in the context of FedRAMP compliance. [3]

v. Ordering activities are responsible for determining any additional information assurance and security related requirements based on the nature of the application and relevant mandates.

b. Deployment Model

If a particular deployment model (Private, Public, Community, or Hybrid) is desired, Ordering Activities are responsible for identifying the desired model(s). Alternately, Ordering Activities could identify requirements and assess Contractor responses to determine the most appropriate deployment model(s).

c. Delivery Schedule

The Ordering Activity shall specify the delivery schedule as part of the initial requirement. The Delivery Schedule options are found in Information for Ordering Activities Applicable to All Special Item Numbers.

d. Interoperability

Ordering Activities are responsible for identifying interoperability requirements. Ordering Activities should clearly delineate requirements for API implementation and standards conformance.

e. Performance of Cloud Computing Services

The Ordering Activity should clearly indicate any custom minimum service levels, performance and scale requirements as part of the initial requirement.

f. Reporting

The Ordering Activity should clearly indicate any cost, performance or availability reporting as part of the initial requirement.

g. Privacy

The Ordering Activity should specify the privacy characteristics of their service and engage with the Contractor to determine if the cloud service is capable of meeting Ordering Activity requirements. For example, a requirement could be requiring assurance that the service is capable of safeguarding Personally Identifiable Information (PII), in accordance with NIST SP 800-1224 [4] and OMB memos M-06-165 [5] and M-07-166.[6] An Ordering Activity will determine what data elements constitute PII according to OMB Policy, NIST Guidance and Ordering Activity policy.

---

[3] MEMORANDUM FOR CHIEF INFORMATION OFFICERS: Security Authorization of Information Systems in Cloud Computing Environments. December 8, 2011.

[4] NIST SP 800-122, "Guide to Protecting the Confidentiality of Personally Identifiable Information (PII)"

[5] OMB memo M-06-16: Protection of Sensitive Agency Information http://www.whitehouse.gov/sites/default/files/omb/memoranda/fy2006/m06-16.pdf

[6] Per Federal Information Processing Standards Publication 199 & 200 (FIPS 199, "Standards for Security Categorization of Federal Information and Information Systems") (FIPS 200, "Minimum Security Requirements for Federal Information and Information Systems")

h. Accessibility

The Ordering Activity should specify the accessibility characteristics of their service and engage with the Contractor to determine the cloud service is capable of meeting Ordering Activity requirements. For example, a requirement could require assurance that the service is capable of providing accessibility based on Section 508 of the Rehabilitation Act of 1973 (29 U.S.C. 794d).

i. Geographic Requirements

Ordering activities are responsible for specifying any geographic requirements and engaging with the Contractor to determine that the cloud services offered have the capabilities to meet geographic requirements for all anticipated task orders. Common geographic concerns could include whether service data, processes and related artifacts can be confined on request to the United States and its territories, or the continental United States (CONUS).

j. Data Ownership and Retrieval and Intellectual Property

Intellectual property rights are not typically transferred in a cloud model. In general, CSPs retain ownership of the Intellectual Property (IP) underlying their services and the customer retains ownership of its intellectual property. The CSP gives the customer a license to use the cloud services for the duration of the contract without transferring rights. The government retains ownership of the IP and data they bring to the customized use of the service as spelled out in the FAR and related materials.

General considerations of data ownership and retrieval are covered under the terms of Schedule 70 and the FAR and other laws, ordinances, and regulations (Federal, State, City, or otherwise). Because of considerations arising from cloud shared responsibility models, ordering activities should engage with the Contractor to develop more cloud-specific understandings of the boundaries between data owned by the government and that owned by the cloud service provider, and the specific terms of data retrieval.

In all cases, the Ordering Activity should enter into an agreement with a clear and enforceable understanding of the boundaries between government and cloud service provider data, and the form, format and mode of delivery for each kind of data belonging to the government.

The Ordering Activity should expect that the Contractor shall transfer data to the government at the government's request at any time, and in all cases when the service or order is terminated for any reason, by means, in formats and within a scope clearly understood at the initiation of the service. Example cases that might require clarification include status and mode of delivery for:

- Configuration information created by the government and affecting the government's use of the cloud provider's service.
- Virtual machine configurations created by the government but operating on the cloud provider's service.
- Profile, configuration and other metadata used to configure SaaS application services or PaaS platform services.

The key is to determine in advance the ownership of classes of data and the means by which Government owned data can be returned to the Government.

---

[6] OMB Memo M-07-16: Safeguarding Against and Responding to the Breach of Personally Identifiable Information http://www.whitehouse.gov/sites/default/files/omb/memoranda/fy2007/m07-16.pdf

k. Service Location Distribution

The Ordering Activity should determine requirements for continuity of operations and performance and engage with the Contractor to ensure that cloud services have adequate service location distribution to meet anticipated requirements. Typical concerns include ensuring that:

- Physical locations underlying the cloud are numerous enough to provide continuity of operations and geographically separate enough to avoid an anticipated single point of failure within the scope of anticipated emergency events.
- Service endpoints for the cloud are able to meet anticipated performance requirements in terms of geographic proximity to service requestors.

Note that cloud providers may address concerns in the form of minimum distance between service locations, general regions where service locations are available, etc.

l. Related Professional Services

Ordering activities should engage with Contractors to discuss the availability of limited assistance with initial setup, training and access to the services that may be available through this SIN.

Any additional substantial and ongoing professional services related to the offering such as integration, migration, and other cloud professional services are out of scope for this SIN. Ordering activities should consult the appropriate GSA professional services schedule.

4. GUIDANCE FOR CONTRACTORS

This section offers guidance for interpreting the Contractor Description Requirements in Table 2, including the NIST essential cloud characteristics, service models and deployment models. This section is not a list of requirements.

Contractor-specific definitions of cloud computing characteristics and models or significant variances from the NIST essential characteristics or models are discouraged and will not be considered in the scope of this SIN or accepted in response to Factors for Evaluation. The only applicable cloud characteristics, service model/subcategories and deployment models for this SIN will be drawn from the NIST 800-145 special publication. Services qualifying for listing as cloud computing services under this SIN must substantially satisfy the essential characteristics of cloud computing as documented in the NIST Definition of Cloud Computing SP 800-1457. 7

Contractors must select deployment models corresponding to each way the service can be deployed. Multiple deployment model designations for a single cloud service are permitted but at least one deployment model must be selected.

Both service and deployment model designations must accord with NIST definitions. Guidance is offered in this document on making the most appropriate selection.

---

[7] http://csrc.nist.gov/publications/nistpubs/800-145/SP800-145.pdfIn addition, contractors submitting services for listing under this SIN are encouraged to select a sub- category for each service proposed under this SIN with respect to a single principal NIST cloud service model that most aptly characterizes the service. Service model categorization is optional.

a. NIST Essential Characteristics

General Guidance
NIST's essential cloud characteristics provide a consistent metric for whether a service is eligible for inclusion in this SIN. It is understood that due to legislative, funding and other constraints that government entities cannot always leverage a cloud service to the extent that all NIST essential characteristics are commercially available. For the purposes of the Cloud SIN, meeting the NIST essential characteristics is determined by whether each essential capability of the commercial service is available for the service, whether or not the Ordering Activity actually requests or implements the capability. The guidance in Table 3 offers examples of how services might or might not be included based on the essential characteristics, and how the Contractor should interpret the characteristics in light of current government contracting processes.

Table 2: Guidance on Meeting NIST Essential Characteristics

Characteristic	Capability	Guidance
On-demand self-service	Ordering activities can directly provision services without requiring Contractor intervention.	· Government procurement guidance varies on how to implement on-demand provisioning at this time.
	This characteristic is typically implemented via a service console or programming interface for provisioning	· Ordering activities may approach on-demand in a variety of ways, including "not-to-exceed" limits, or imposing monthly or annual payments on what are essentially on demand services. · Services under this SIN must be capable of true on- demand self-service, and ordering activities and Contractors must negotiate how they implement on demand capabilities in practice at the task order level:

- Ordering activities must specify their procurement approach and requirements for on-demand service
- Contractors must propose how they intend to meet the approach
- Contractors must certify that on-demand self-service is technically available for their service should procurement guidance become available.

Broad Network Access	Ordering activities are able to access services over standard agency networks	· Broad network access must be available without significant qualification and in relation to the deployment model and security domain of the service
	Service can be accessed and consumed using standard devices such as browsers, tablets and mobile phones	· Contractors must specify any ancillary activities, services or equipment required to access cloud services or integrate cloud with other cloud or non- cloud networks and services. For example a private cloud might require an Ordering Activity to purchase or provide a dedicated router, etc. which is acceptable but should be indicated by the Contractor.
Resource Pooling	Pooling distinguishes cloud services from offsite hosting.	· The cloud service must draw from a pool of resources and provide an automated means for the Ordering Activity to dynamically allocate them.
	Ordering activities draw resources from a common pool maintained by the Contractor	· Manual allocation, e.g. manual operations at a physical server farm where Contractor staff configure servers in response to Ordering Activity requests, does not meet this requirement
	Resources may have general characteristics such as regional location	· Similar concerns apply to software and platform models; automated provisioning from a pool is required
		· Ordering activities may request dedicated physical hardware, software or platform resources to access a private cloud deployment service. However the provisioned cloud resources must be drawn from a common pool and automatically allocated on request.
Rapid Elasticity	Rapid provisioning and de-provisioning commensurate with demand	· Rapid elasticity is a specific demand-driven case of self-service
		· Procurement guidance for on-demand self-service applies to rapid elasticity as well, i.e. rapid elasticity must be technically available but ordering activities and Contractors may mutually negotiate other contractual arrangements for procurement and payment.
		· 'Rapid' should be understood as measured in minutes and hours, not days or weeks.
		· Elastic capabilities by manual request, e.g. via a console operation or programming interface call, are required.
		· Automated elasticity which is driven dynamically by system load, etc. is optional. Contractors must specify whether automated demand-driven elasticity is available and the general mechanisms that drive the capability.
Measured Service	Measured service should be understood as a reporting requirement that enables an Ordering Activity to control their use in cooperation with self service	· Procurement guidance for on-demand self-service applies to measured service as well, i.e. rapid elasticity must be technically available but ordering activities and Contractors may mutually designate other contractual arrangements.
		· Regardless of specific contractual arrangements, reporting must indicate actual usage, be continuously available to the Ordering Activity, and provide meaningful metrics appropriate to the service measured
		· Contractors must specify that measured service is available and the general sort of metrics and mechanisms available

Inheriting Essential Characteristics
Cloud services may depend on other cloud services, and cloud service models such as PaaS and SaaS are able to inherit essential characteristics from other cloud services that support them. For example a PaaS platform service can inherit the broad network access made available by the IaaS service it runs on, and in such a situation would be fully compliant with the broad network access essential characteristic. Services inheriting essential characteristics must make the inherited characteristic fully available at their level of delivery to claim the relevant characteristic by inheritance.

Inheriting characteristics does not require the inheriting provider to directly bundle or integrate the inherited service, but it does require a reasonable measure of support and identification. For example, the Ordering Activity may acquire an IaaS service from “Provider A” and a PaaS service from “Provider B”. The PaaS service may inherit broad network access from “Provider A” but must identify and support the inherited service as an acceptable IaaS provider.

Assessing Broad Network Access
Typically broad network access for public deployment models implies high bandwidth access from the public internet for authorized users. In a private cloud deployment internet access might be considered broad access, as might be access through a dedicated shared high bandwidth network connection from the Ordering Activity, in accord with the private nature of the deployment model.

Resource Pooling and Private Cloud
All cloud resource pools are finite, and only give the appearance of infinite resources when sufficiently large, as is sometimes the case with a public cloud. The resource pool supporting a private cloud is typically smaller with more visible limits. A finite pool of resources purchased as a private cloud service qualifies as resource pooling so long as the resources within the pool can be dynamically allocated to the ultimate users of the resource, even though the pool itself appears finite to the Ordering Activity that procures access to the pool as a source of dynamic service allocation.

b. NIST Service Model

The Contractor may optionally document the service model of cloud computing (e.g. IaaS, PaaS, SaaS, or a combination thereof, that most closely describes their offering, using the definitions in The NIST Definition of Cloud Computing SP 800-145. The following guidance is offered for the proper selection of service models.

NIST’s service models provide this SIN with a set of consistent sub-categories to assist ordering activities in locating and comparing services of interest. Service model is primarily concerned with the nature of the service offered and the staff and activities most likely to interact with the service. Contractors should select a single service model most closely corresponding to their proposed service based on the guidance below. It is understood that cloud services can technically incorporate multiple service models and the intent is to provide the single best categorization of the service.

Contractors should take care to select the NIST service model most closely corresponding to each service offered. Contractors should not invent, proliferate or select multiple cloud service model sub-categories to distinguish their offerings, because ad-hoc categorization prevents consumers from comparing similar offerings. Instead vendors should make full use of the existing NIST categories to the fullest extent possible.

For example, in this SIN an offering commercially marketed by a Contractor as “Storage as a Service” would be properly characterized as Infrastructure as a Service (IaaS), storage being a subset of infrastructure. Services commercially marketed as “LAMP as a Service” or “Database as a Service” would be properly characterized under this SIN as Platform as a Service (PaaS), as they deliver two kinds of platform services. Services commercially marketed as “Travel Facilitation as a Service” or “Email as a Service” would be properly characterized as species of Software as a Service (SaaS) for this SIN. However, Contractors can and should include appropriate descriptions (include commercial marketing terms) of the service in the full descriptions of the service’s capabilities.

When choosing between equally plausible service model sub-categories, Contractors should consider several factors:

1. Visibility to the Ordering Activity. Service model sub-categories in this SIN exist to help Ordering Activities match their requirements with service characteristics. Contractors should select the most intuitive and appropriate service model from the point of view of an Ordering Activity.

2) Primary Focus of the Service. Services may offer a mix of capabilities that span service models in the strict technical sense. For example, a service may offer both IaaS capabilities for processing and storage, along with some PaaS capabilities for application deployment, or SaaS capabilities for specific applications. In a service mix situation the Contractor should select the service model that is their primary focus. Alternatively contractors may choose to submit multiple service offerings for the SIN, each optionally and separately subcategorized.

3) Ordering Activity Role. Contractors should consider the operational role of the Ordering Activity’s primary actual consumer or operator of the service. For example services most often consumed by system managers are likely to fit best as IaaS; services most often consumed by application deployers or developers as PaaS, and services most often consumed by business users as SaaS.

4) Lowest Level of Configurability. Contractors can consider IaaS, PaaS and SaaS as an ascending hierarchy of complexity, and select the model with the lowest level of available Ordering Activity interaction. As an example, virtual machines are an IaaS service often bundled with a range of operating systems, which are PaaS services. The Ordering Activity usually has access to configure the lower level IaaS service, and the overall service should be considered IaaS. In cases where the Ordering Activity cannot configure the speed, memory, network configuration, or any other aspect of the IaaS component, consider categorizing as a PaaS service.

Cloud management and cloud broker services should be categorized based on their own characteristics and not those of the other cloud services that are their targets. Management and broker services typically fit the SaaS service model, regardless of whether the services they manage are SaaS, PaaS or IaaS. Use Table 3 to determine which service model is appropriate for the cloud management or cloud broker services, or, alternately choose not to select a service model for the service.

The guidance in Table 3 offers examples of how services might be properly mapped to NIST service models and how a Contractor should interpret the service model sub-categories.

Table 3: Guidance on Mapping to NIST Service Models

Service Model	Guidance
Infrastructure as a Service (IaaS)	Select an IaaS model for service based equivalents of hardware appliances such as virtual machines, storage devices, routers and other physical devices. · IaaS services are typically consumed by system or device managers who would configure physical hardware in a non-cloud setting · The principal customer interaction with an IaaS service is provisioning then configuration, equivalent to procuring and then configuring a physical device. Examples of IaaS services include virtual machines, object storage, disk block storage, network routers and firewalls, software defined networks. Gray areas include services that emulate or act as dedicated appliances and are directly used by applications, such as search appliances, security appliances, etc. To the extent that these services or their emulated devices provide direct capability to an application they might be better classified as Platform services (PaaS). To the extent that they resemble raw hardware and are consumed by other platform services they are better classified as IaaS.
Platform as a Service (PaaS)	Select a PaaS model for service based equivalents of complete or partial software platforms. For the purposes of this classification, consider a platform as a set of software services capable of deploying all or part of an application. · A complete platform can deploy an entire application. Complete platforms can be proprietary or open source · Partial platforms can deploy a component of an application which combined with other components make up the entire deployment · PaaS services are typically consumed by application deployment staff whose responsibility is to take a completed agency application and cause it to run on the designated complete or partial platform service · The principal customer interaction with a PaaS service is deployment, equivalent to deploying an application or portion of an application on a software platform service. · A limited range of configuration options for the platform service may be available. Examples of complete PaaS services include: · A Linux/Apache/MySQL/PHP (LAMP) platform ready to deploy a customer PHP application, · a Windows .Net platform ready to deploy a .Net application, · A custom complete platform ready to develop and deploy an customer application in a proprietary language · A multiple capability platform ready to deploy an arbitrary customer application on a range of underlying software services. The essential characteristic of a complete PaaS is defined by the customer's ability to deploy a complete custom application directly on the platform. PaaS includes partial services as well as complete platform services. Illustrative examples of individual platform enablers or components include: · A database service ready to deploy a customer's tables, views and procedures, · A queuing service ready to deploy a customer's message definitions · A security service ready to deploy a customer's constraints and target applications for continuous monitoring The essential characteristic of an individual PaaS component is the customer's ability to deploy their unique structures and/or data onto the component for a partial platform function. Note that both the partial and complete PaaS examples all have two things in common: · They are software services, which offer significant core functionality out of the box · They must be configured with customer data and structures to deliver results

	As noted in IaaS, operating systems represent a grey area in that OS is definitely a platform service, but is typically bundled with IaaS infrastructure. If your service provides an OS but allows for interaction with infrastructure, please sub-categorize it as IaaS. If your service "hides" underlying infrastructure, consider it as PaaS.
Software as a Service (SaaS)	Select a SaaS model for service based equivalents of software applications. · SaaS services are typically consumed by business or subject-matter staff who would interact directly with the application in a non-cloud setting · The principal customer interaction with a SaaS service is actual operation and consumption of the application services the SaaS service provides. Some minor configuration may be available, but the scope of the configuration is limited to the scope and then the permissions of the configuring user. For example an agency manager might be able to configure some aspects of the application for their agency but not all agencies. An agency user might be able to configure some aspects for themselves but not everyone in their agency. Typically only the Contractor would be permitted to configure aspects of the software for all users. Examples of SaaS services include email systems, business systems of all sorts such as travel systems, inventory systems, etc., wiki's, websites or content management systems, management applications that allow a customer to manage other cloud or non-cloud services, and in general any system where customers interact directly for a business purpose. Gray areas include services that customers use to configure other cloud services, such as cloud management software, cloud brokers, etc. In general these sorts of systems should be considered SaaS, per guidance in this document.

c. Deployment Model

Deployment models (e.g. private, public, community, or hybrid) are not restricted at the SIN level and any specifications for a deployment model are the responsibility of the Ordering Activity.

Multiple deployment model selection is permitted, but at least one model must be selected. The guidance in Table 4 offers examples of how services might be properly mapped to NIST deployment models and how the Contractor should interpret the deployment model characteristics. Contractors should take care to select the range of NIST deployment models most closely corresponding to each service offered.

Note that the scope of this SIN does not include hardware or software components used to construct a cloud, only cloud capabilities delivered as a service, as noted in the Scope section.

Table 4: Guidance for Selecting a Deployment Model

Deployment Model	Guidance
Private Cloud	The service is provided exclusively for the benefit of a definable organization and its components; access from outside the organization is prohibited. The actual services may be provided by third parties, and may be physically located as required, but access is strictly defined by membership in the owning organization.
Public Cloud	The service is provided for general public use and can be accessed by any entity or organization willing to contract for it.
Community Cloud	The service is provided for the exclusive use of a community with a definable shared boundary such as a mission or interest. As with private cloud, the service may be in any suitable location and administered by a community member or a third party.
Hybrid Cloud	The service is composed of one or more of the other models. Typically hybrid models include some aspect of transition between the models that make them up, for example a private and public cloud might be designed as a hybrid cloud where events like increased load permit certain specified services in the private cloud to run in a public cloud for extra capacity, e.g. bursting.

TERMS AND CONDITIONS APPLICABLE TO
ELECTRONIC COMMERCE AND SUBSCRIPTION SERVICES (SPECIAL IDENTIFICATION NUMBER 54151ECOM)

1. SCOPE

The prices, terms and conditions stated under Special Item Number 54151ECOM Electronic Commerce (EC) Services apply exclusively to EC Services within the scope of this Information Technology Schedule.

2. ELECTRONIC COMMERCE CAPACITY AND COVERAGE

The Ordering Activity shall specify the capacity and coverage required as part of the initial requirement.

3. INFORMATION ASSURANCE

a. The Ordering Activity is responsible for ensuring to the maximum extent practicable that each requirement issued is in compliance with the Federal Information Security Management Act (FISMA)

b. The Ordering Activity shall assign an impact level (per Federal Information Processing Standards Publication 199 & 200 (FIPS 199, *"Standards for Security Categorization of Federal Information* and Information Systems") (FIPS 200, "Minimum Security Requirements for Federal Information and Information Systems") prior to issuing the initial statement of work. Evaluations shall consider the extent to which each proposed service accommodates the necessary security controls based upon the assigned impact level. The Contractor awarded SIN 132-52 is capable of meeting at least the minimum security requirements assigned against a low-impact information system (per FIPS 200).

c. The Ordering Activity reserves the right to independently evaluate, audit, and verify the FISMA compliance for any proposed or awarded Electronic Commerce services. All FISMA certification, accreditation, and evaluation activities are the responsibility of the ordering activity.

4. DELIVERY SCHEDULE.

The Ordering Activity shall specify the delivery schedule as part of the initial requirement. The Delivery Schedule options are found in *Information for Ordering Activities Applicable to All Special Item Numbers,* paragraph 6. Delivery Schedule.

5. INTEROPERABILITY.

When an Ordering Activity requires interoperability, this requirement shall be included as part of the initial requirement. Interfaces may be identified as interoperable on the basis of participation in a sponsored program acceptable to the Ordering Activity. Any such access or interoperability with teleports/gateways and provisioning of enterprise service access will be defined in the individual requirement.

6. ORDER

a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering electronic services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all electronic services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.

b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

7. PERFORMANCE OF ELECTRONIC SERVICES

The Contractor shall provide electronic services on the date agreed to by the Contractor and the ordering activity.

8. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character.

9. RIGHTS IN DATA

The Contractor shall comply FAR 52.227-14 RIGHTS IN DATA – GENERAL and with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character.

10. ACCEPTANCE TESTING

If requested by the ordering activity the Contractor shall provide acceptance test plans and procedures for ordering activity approval. The Contractor shall perform acceptance testing of the systems for ordering activity approval in accordance with the approved test procedures.

11. WARRANTY

The Contractor shall provide a warranty covering each Contractor-provided electronic commerce service. The minimum duration of the warranty shall be the duration of the manufacturer's commercial warranty for the item listed below:

Specific Akamai contract commitments, warranties, and representations include, in addition to those agreed to for the entire schedule contract, the following:

a. Time of delivery/ installation quotations for individual orders;

b. Technical representations and/or warranties of products concerning performance, total system performance and/or configuration, physical, design and/or functional characteristics and capabilities of a product/ equipment/ service/ software package submitted in response to requirements which result in orders under this schedule contract; and

c. Any representations and/or warranties concerning the products made in any literature, description, drawings and/or specifications furnished by the Contractor.

The warranty shall commence upon the later of the following:

a. Activation of the user's service
b. Installation/delivery of the equipment

The Contractor, by repair or replacement of the defective item, shall complete all warranty services within five working days of notification of the defect. Warranty service shall be deemed complete when the user has possession of the repaired or replaced item. If the Contractor renders warranty service by replacement, the user shall return the defective item(s) to the Contractor as soon as possible but not later than ten (10) working days after notification.

12. MANAGEMENT AND OPERATIONS PRICING

The Contractor shall provide management and operations pricing on a uniform basis. All management and operations requirements for which pricing elements are not specified shall be provided as part of the basic service.

13. TRAINING

The Contractor shall provide normal commercial installation, operation, maintenance, and engineering interface training on the system. If there is a separate charge, indicate below:
Please refer to Pricelist items under SIN 611420.

14. MONTHLY REPORTS

In accordance with commercial practices, the Contractor may furnish the ordering activity/user with a monthly summary ordering activity report.

15. ELECTRONIC COMMERCE SERVICE PLAN

a. Describe the electronic service plan and eligibility requirements.
See Pricelist

b. Describe charges, if any, for additional usage guidelines.
See Pricelist

c. Describe corporate volume discounts and eligibility requirements, if any.
See Pricelist

TERMS AND CONDITIONS APPLICABLE TO
INFORMATION TECHNOLOGY (IT) PROFESSIONAL SERVICES (SPECIAL ITEM NUMBER 54151S)

1. SCOPE

a. The prices, terms and conditions stated under Special Item Number 54151S Information Technology Professional Services apply exclusively to Professional Services within the scope of this Information Technology Schedule.

b. The Contractor shall provide services at the Contractor's facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

2. PERFORMANCE INCENTIVES I-FSS-60 Performance Incentives (April 2000)

a. Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract.

b. The ordering activity must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.

c. Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity's mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.

3. ORDER

a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.

b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

4. PERFORMANCE OF SERVICES

a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.

b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.

c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.

d. Any Contractor travel required in the performance of IT Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

5. STOP-WORK ORDER (FAR 52.242-15) (AUG 1989)

a. The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either-

(1) Cancel the stop-work order; or

(2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

b. If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if-

(1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and

(2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.

c. If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.

d. If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

6. INSPECTION OF SERVICES

In accordance with FAR 52.212-4 CONTRACT TERMS AND CONDITIONS--COMMERCIAL ITEMS (MAR 2009) (DEVIATION I - FEB 2007) for Firm-Fixed Price orders and FAR 52.212-4 CONTRACT TERMS AND CONDITIONS, COMMERCIAL ITEMS (MAR 2009) (ALTERNATE I OCT 2008) (DEVIATION I – FEB 2007) applies to Time-and-Materials and Labor-Hour Contracts orders placed under this contract.

7. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Dec 2007) Rights in Data – General, may apply.

8. RESPONSIBILITIES OF THE ORDERING ACTIVITY

Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite IT Professional Services.

9. INDEPENDENT CONTRACTOR

All IT Professional Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

10. ORGANIZATIONAL CONFLICTS OF INTEREST

a. Definitions.

"Contractor" means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

"Contractor and its affiliates" and "Contractor or its affiliates" refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An "Organizational conflict of interest" exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize,or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

11. INVOICES

The Contractor, upon completion of the work ordered, shall submit invoices for IT/IAM Professional services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

12. PAYMENTS

For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to labor-hour orders placed under this contract. 52.216-31(Feb 2007) Time-and-Materials/Labor-Hour Proposal Requirements—Commercial Item Acquisition As prescribed in 16.601(e)(3), insert the following provision:

a. The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation.

b. The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by—

(1) The offeror;
(2) Subcontractors; and/or
(3) Divisions, subsidiaries, or affiliates of the offeror under a common control.

13. RESUMES

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

14. INCIDENTAL SUPPORT COSTS

Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

15. APPROVAL OF SUBCONTRACTS

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

16. DESCRIPTION OF IT/IAM PROFESSIONAL SERVICES AND PRICING

See Pricelist

TERMS AND CONDITIONS APPLICABLE TO PURCHASE OF INFORMATION TECHNOLOGY TRAINING FOR GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY EQUIPMENT AND SOFTWARE (SPECIAL ITEM NUMBER 611420)

1. SCOPE

a. The Contractor shall provide training courses normally available to commercial customers, which will permit ordering activity users to make full, efficient use of general purpose commercial IT products. Training is restricted to training courses for those products within the scope of this solicitation.

b. The Contractor shall provide training at the Contractor's facility and/or at the ordering activity's location, as agreed to by the Contractor and the ordering activity.

2. ORDER

Written orders, EDI orders (GSA Advantage! and FACNET), credit card orders, and orders placed under blanket purchase agreements (BPAs) shall be the basis for the purchase of training courses in accordance with the terms of this contract. Orders shall include the student's name, course title, course date and time, and contracted dollar amount of the course.

3. TIME OF DELIVERY

The Contractor shall conduct training on the date (time, day, month, and year) agreed to by the Contractor and the ordering activity.

4. CANCELLATION AND RESCHEDULING

a. The ordering activity will notify the Contractor at least seventy-two (72) hours before the scheduled training date, if a student will be unable to attend. The Contractor will then permit the ordering activity to either cancel the order or reschedule the training at no additional charge. In the event the training class is rescheduled, the ordering activity will modify its original training order to specify the time and date of the rescheduled training class.

b. In the event the ordering activity fails to cancel or reschedule a training course within the time frame specified in paragraph a, above, the ordering activity will be liable for the contracted dollar amount of the training course. The Contractor agrees to permit the ordering activity to reschedule a student who fails to attend a training class within ninety (90) days from the original course date, at no additional charge.

c. The ordering activity reserves the right to substitute one student for another up to the first day of class.

d. In the event the Contractor is unable to conduct training on the date agreed to by the Contractor and the ordering activity, the Contractor must notify the ordering activity at least seventy-two (72) hours before the scheduled training date.

5. FOLLOW-UP SUPPORT

The Contractor agrees to provide each student with unlimited telephone support or online support for a period of one (1) year from the completion of the training course. During this period, the student may contact the Contractor's instructors for refresher assistance and answers to related course curriculum questions.

6. PRICE FOR TRAINING

The price that the ordering activity will be charged will be the ordering activity training price in effect at the time of order placement, or the ordering activity price in effect at the time the training course is conducted, whichever is less.

7. INVOICES AND PAYMENT

Invoices for training shall be submitted by the Contractor after ordering activity completion of the training course. Charges for training must be paid in arrears (31 U.S.C. 3324). PROMPT PAYMENT DISCOUNT, IF APPLICABLE, SHALL BE SHOWN ON THE INVOICE.

8. FORMAT AND CONTENT OF TRAINING

a. The Contractor shall provide written materials (i.e., manuals, handbooks, texts, etc.) normally provided with course offerings, printed and copied two-sided on paper containing 30% postconsumer materials (fiber). Such documentation will become the property of the student upon completion of the training class.

b. **If applicable** For hands-on training courses, there must be a one-to-one assignment of IT equipment to students.

c. The Contractor shall provide each student with a Certificate of Training at the completion of each training course.

d. The Contractor shall provide the following information for each training course offered:

(1) The course title and a brief description of the course content, to include the course format (e.g., lecture, discussion, hands-on training);
(2) The length of the course;
(3) Mandatory and desirable prerequisites for student enrollment;
(4) The minimum and maximum number of students per class;
(5) The locations where the course is offered;
(6) Class schedules; and
(7) Price (per student, per class (if applicable)).

e. For those courses conducted at the ordering activity's location, instructor travel charges (if applicable), including mileage and daily living expenses (e.g., per diem charges) are governed by Pub. L. 99-234 and FAR Part 31.205-46, and are reimbursable by the ordering activity on orders placed under the Multiple Award Schedule, as applicable, in effect on the date(s) the travel is performed. Contractors cannot use GSA city pair contracts. The Industrial Funding Fee does NOT apply to travel and per diem charges.

f. For Online Training Courses, a copy of all training material must be available for electronic download by the students.

9. "NO CHARGE" TRAINING

The Contractor shall describe any training provided with equipment and/or software provided under this contract, free of charge, in the space provided below.

TERMS AND CONDITIONS APPLICABLE TO
ORDER -LEVEL MATERIALS (SPECIAL IDENTIFICATION NUMBER: OLM)

Order-Level Materials (OLM) - OLMs are supplies and/or services acquired in direct support of an individual task or delivery order placed against a Schedule contract or BPA. OLM pricing is not established at the Schedule contract or BPA level, but at the order level. Since OLMs are identified and acquired at the order level, the ordering contracting officer (OCO) is responsible for making a fair and reasonable price determination for all OLMs. OLMs are procured under a special ordering procedure that simplifies the process for acquiring supplies and services necessary to support individual task or delivery orders placed against a Schedule contract or BPA. Using this new procedure, ancillary supplies and services not known at the time of the Schedule award may be included and priced at the order level.

OLM SIN-Level Requirements/Ordering Instructions:

OLMs are:
- Purchased under the authority of the FSS Program
- Unknown until an order is placed
- Defined and priced at the ordering activity level in accordance with GSAR clause 552.238-115 Special Ordering Procedures for the Acquisition of Order-Level Materials. (Price analysis for OLMs is not conducted when awarding the FSS contract or FSS BPA; therefore, GSAR 538.270 and 538.271 do not apply to OLMs)
- Only authorized for use in direct support of another awarded SIN.
- Only authorized for inclusion at the order level under a Time-and-Materials (T&M) or Labor-Hour (LH) Contract Line Item Number (CLIN)
- Subject to a Not To Exceed (NTE) ceiling price

OLMs are not:
- Open Market Items
- Items awarded under ancillary supplies/services or other direct cost (ODC) SINs (these items are defined, priced, and awarded at the FSS contract level)

OLM Pricing:
- Prices for items provided under the Order-Level Materials SIN must be inclusive of the Industrial Funding Fee (IFF).
- The value of OLMs in a task or delivery order, or the cumulative value of OLMs in orders against an FSS BPA awarded under an FSS contract, cannot exceed 33.33%.
  NOTE: When used in conjunction with a Cooperative Purchasing eligible SIN, this SIN is Cooperative Purchasing Eligible.

Akamai	Cloud Monitor		**CLOUD MONITOR**			
Akamai	Cloud Monitor		**Notes**			
Akamai	Cloud Monitor		A customer selects a plan that will meet or exceed their need for "Millions of Log Lines Delivered". Overage charges are based on per million Log Lines delivered above the plan's allowed amount. Overage rates will vary depending on the plan selected. For example: If a customer purchses the 5,000 MLLD Plan, they are allowed 5,000 million log lines delivered per month. However, if they go over this amount in any given month, they will be charged $.80 per million log lines delivered for any amount over the allowed 5,000 million log lines delivered. Additionally, a customer may chose the "Pay as You Go" plan. Under this plan, they will only be charged per million log lines actually delivered per month.

Akamai	Rigor Synthetic Monitoring		**RIGOR SYNTHETIC MONITORING**			
			Web, api and mobile monitoring solution focused on providing proactive, actionable insight into digital performance. Digital performance monitoring platform that pairs synthetic monitoring technology with automated performance analysis to provide continuous visibility of the end-user experience. This solution proactively identifies and provides remediation for front-end performance bottlenecks at any stage of the development process to prevent users from being impacted by poor performance.

Akamai	Visitor Prioritization		Customers are charged a monthly flat fee based on the amount of traffic pushed on their core delivery product. The flat fee is calculated based on the underlying core product's average traffic for the last 3 months. The fee varies depending on what tier the amount of traffic falls into. The fee is a flat fee and NOT a per unit rate. There are no overages as there is no commitment. Pricing is a monthly rate for a short-term contract (up to 3 months).

Akamai	ODMS		**EDGECOMPUTING**			
Akamai	ODMS		Akamai EdgeComputing is an "On Demand" computing service that enables			
Akamai	ODMS		enterprises to execute sophisticated application logic on Akamai edge servers,			
Akamai	ODMS		thus reducing the number of requests and amount of infrastructure in an			
Akamai	ODMS		organization's application tier. Akamai supports three types of EdgeComputing:			
Akamai	ODMS					
Akamai	ODMS		**(1) EdgeComputing powered by WebSphere** is a deployment model for			
Akamai	ODMS		IBM WebSphere applications onto Akamai's network.			
Akamai	ODMS					
Akamai	ODMS		**(2) EdgeComputing powered by Tomcat** is a deployment model for			
Akamai	ODMS		standard Servlet and JSP applications using the Tomcat Servers on Akamai's			
Akamai	ODMS		network.			
Akamai	ODMS					
Akamai	ODMS		**(3) EdgeComputing ESI** (Edge Side Includes) provides customers with			
Akamai	ODMS		access to execution of sophisticated logic on Akamai's network.			
Akamai	ODMS					
Akamai	ODMS					
Akamai	ODMS		All types of EdgeComputing are priced using a pay per use utility computing			
Akamai	ODMS		model. It is important to note that EdgeComputing ***requires*** the customer			
Akamai	ODMS		to have DSA/DSD, or WAA.			
Akamai	ODMS					
Akamai	ODMS		The EdgeComputing contract pricing model is flexible to accommodate usage			
Akamai	ODMS		based on the number of end user requests. A ***"Request"*** is defined as the			
Akamai	ODMS		HTTP get or post of a JSP, Servlet, ESI script, or XSLT style sheet. Pricing is			
Akamai	ODMS		based upon a threshold of 250 CPU milliseconds per request and a cumulative			
Akamai	ODMS		application server memory usage threshold of 75MB as measured by Akamai.			
Akamai	ODMS		Akamai reserves the right to remove applications from the Akamai network			

MFG	FAMILY	MFG PART	DESCRIPTION	GSA PRICE	GSA SIN CODE	ORIGIN
			NOVEMBER 18, 2020			
Akamai	ODMS		or charge additional fees if Customer's usage exceeds either threshold as			
Akamai	ODMS		measured by Akamai.			
Akamai	ODMS					
Akamai	ODMS		**Committed Usage Rate Pricing**			
Akamai	ODMS		Akamai EdgeComputing is priced according to the monthly Committed Usage			
Akamai	ODMS		Usage Rate (CUR) of the Akamai platform. When a customer exceeds their			
Akamai	ODMS		CUR the rate per MM of requests will remain constant rather than lowering to			
Akamai	ODMS		the rate in the next range. For example, if a customer has a CUR of 20 MM			
Akamai	ODMS		requests they will pay $ 875 per million requests. If for one month they use 26			
Akamai	ODMS		MM requests they will be charged $ 875 per million requests on all of the			
Akamai	ODMS		requests, and they will not be able to take advantage of the lower rate of			
Akamai	ODMS		$ 825 associated with a CUR of 25 MM requests.			
Akamai	ODMS					
Akamai	ODMS		**EdgeComputing Professional Services**			
Akamai	ODMS		Each EdgeComputing application requires a Professional Services engagement			
Akamai	ODMS		for implementation. If the customer is not using an EdgeComputing application			
Akamai	ODMS		package (see below) Professional Services will require an application scoping			
Akamai	ODMS		For implementation. If the customer is not using an EdgeComputing application			
Akamai	ODMS					
Akamai	ODMS		**Ongoing Application Support**			
Akamai	ODMS		Post-implementation, ongoing support is provided via EdgeComputing			
Akamai	ODMS		application support. Application support ***is required*** for every EdgeComputing			
Akamai	ODMS		implementation. EdgeComputing application support provides the following:			
Akamai	ODMS					
Akamai	ODMS					
Akamai	ODMS					
Akamai	ODMS					
Akamai	ODMS		- Accelerated, guaranteed Akamai Customer Care response times and a virtually			
Akamai	ODMS		unlimited number of service tickets.			
Akamai	ODMS		- Consulting support during application upgrades, feature changes, etc.			
Akamai	ODMS		- A dedicated Consultant for customers over 3MM CUR.			
Akamai	ODMS		- Maintenance and upgrades for EdgeComputing, such as newer versions of			
Akamai	ODMS		software and tools as they become available.			
Akamai	ODMS

Akamai	Web Performance		**mPulse**			
			Notes: mPulse is offered under three pricing models all with the same billing unit of beacons. Each model has 10 Tiers which offer a range of beacons: 1) Default Pricing Model: A monthly commit level with overages. For example, between 101M-250M beacons per month. Any beacons over 250M in a 1 month period will be charge at a rate of 1M beacons. 2) Fixed tiers with no overages (Customers will be rate-limited to stay w/in commit tier. Minimum of 25M beacons for fixed billing model). 3) Annual bucket with Overages. Customers purchase a "bucket" of beacons that can be used at any point during the 12 month contract. Overages are not charged until they use all the beacons in their bucket. This model allows for spikey traffic. Overages are still charged at a rate of 1M beacons. mPulse software licenses at the following link apply: https://www.akamai.com/us/en/privacy-policies/product-license-agreements/

Akamai	Web Performance		**CLOUDTEST**			
			Notes: CloudTest is sold according to Virtual Users (VU's) levels. Up to 5,000 VU's means a customer can run tests that stress the system up to a level of 5,000 concurrent virtual users. In order to generate 5,000 virtual users the customer can either use servers from their own cloud provider accounts or they can use Akamai accounts. This is sold as "server hours". There is a minimum of 10 servers hours if the customer chooses to use Akamai accounts. CloudTest default pricing is annual one time, up front payment. Monthly billing is available but not preferred. CloudTest software licenses at the following link apply: https://www.akamai.com/us/en/privacy-policies/product-license-agreements/

Akamai	CloudTest on Demand		**CLOUDTEST ON DEMAND**			
			Notes: CloudTest On Demand is a turnkey service provided by Akamai. Includes 3 Test Execution Hours, and 25 Test Service Hours. The customer purchases "Test Executions" designated by the number of virtual users they want to simulate in a given test. Example: Test Execution up to 5000 virtual user (vus). This test includes all the Test Services necessary to build the test, execute the test and report the test results. There are multiple levels of VUs. Example: up to 5,000, up to 10,000 all the way up to 100s of thousands of vus. A typical order might look like this: 3 Test Executions up to 5Kvus 6 Test Executions up to 25K vus. Additional Test Services are sometimes required for a test and are added as Additional Test Services. CloudTest software licenses at the following link apply: https://www.akamai.com/us/en/privacy-policies/product-license-agreements/

			AKAMAI MEDIA DELIVERY			
Akamai	Media Delivery		**Adaptive Media Player: Device Standard**			
Akamai	Media Delivery		Notes: AMP provides an excellent foundation for a truly high-quality media playback experience, optimized for multiple device viewing. Leveraging AMP enables a simplified media player approach for content providers while enabling an improved video quality experience. AMP also makes it easier and faster to deploy advanced video delivery and quality techniques such as adaptive bitrate streaming technology and HTTP protocols.			
Akamai	Media Delivery	AMP-DST-EAF-19-001	Adaptive Media Player: Device Standard, Base Fee, One Time	$8,060.45	54151ECOM	USA
Akamai	Media Delivery	AMP-DST-PEA-19-001	Adaptive Media Player: Device Standard, Usage, Monthly	$4,836.27	54151ECOM	USA
Akamai	Media Delivery	AMP-DST-ADL-17-001	Adaptive Media Player: Device Standard, Additional Licenses, 1 - 999,999,999, Commitment, Monthly	$483.63	54151ECOM	USA
Akamai	Media Delivery		**MEDIA SERVICES ON DEMAND**			
Akamai	Media Delivery		**Notes**			
Akamai	Media Delivery		Media Encryption is an option the customer can add if they leverage Stream Packaging (i.e. Media Encryption is an option of Stream Packaging). The fee is based on the customer's delivery pricing and is based on actual usage. The monthly commitment is calculated as a percentage of the delivery commitment. For example if the customer has a delivery commitment of $1000 per month the list price for ME would be $400 per month.

Akamai	Cloud Security		**BOT MANAGER**			
Akamai	Cloud Security		**Notes:**			
Akamai	Cloud Security		Bot Manager can be ordered in either Mbps or GB. Commitments are priced per unit. If the customer exceeds their commitment, an overage charge is applied. The plan includes one site OR one application, customer can add any number of additional sites and/or applications in combination. Bot Manager entitles the customer to 10 GB of NetStorage and optionally, if required, one Site Shield map. Customers have the option to add additional Site Shield maps, each additional map requires a corresponding Additional Site Shield where the price is based upon the tier of the associated delivery solution. **Note**: **Site Shield is a recommended option of Bot Manager but it is not required.** If Site Shield is selected, it comes with 1 Site Shield Map. Each additional map requires a corresponding Additional Site Shield where the price is based upon the UOM tier selection of Bot Manager.

Akamai	Cloud Security		**BOT MANAGER PREMIER**			
			Notes: Bot Manager Premier can be ordered in either Mbps or GB. Commitments are priced per unit. If the customer exceeds their commitment, an overage charge is applied. The plan includes one site OR one application per Contract Term, and the customer can add any number of additional sites and/or applications in combination. Bot Manager Premier entitles the customer to 10 GB of NetStorage per Contract Term, and optionally if required, one Site Shield map per Contract Term. Customers have the option to add additional Site Shield maps, and each additional map requires a corresponding Additional Site Shield where the price is based upon the tier of the associated delivery solution. If sold to protect properties using a whole site delivery product, commitments for Bot Manager must match that for the whole site delivery product on the same contract. **Site Shield is a recommended option of Bot Manager but it is not required.** If Site Shield is selected, it comes with 1 Site Shield Map. Each additional map requires a corresponding Additional Site Shield where the price is based upon the UOM tier selection of Bot Manager Premier.

Akamai	Cloud Security		**WEB APPLICATION PROTECTOR**			
			Notes: Web Application Protector provides support for one policy which covers all requests on the protected Domain(s). Additional policies are not supported. Web Application Protector (WAP) can be ordered in either Mbps or GB. The included amount (Mbps or GB) is based on the plan 'tier' and the Base Fee. The plan includes protection for one Domain. Customer can purchase entitlement to protect additional Domains. Web Application Protector includes DDoS Fee Protection, and entitles the customer to 10 GB of NetStorage. HTTPS support with one choice of ALL available SNI-only cert is included EXCEPT "Wildcard SAN SNI". Additional or alternative certificates may be purchased separately. Customers may optionally purchase Site Shield. If sold to protect properties using a separate whole site delivery product, commitments for WAP must match that for the whole site delivery product on the same contract. It is recommended to purchase Additional Domains in blocks instead of single Domains. Ex Calculation: If you need additional 12 domains, Suggested: 1Block of 10 Domains + 2 * 1 Domain)

Akamai	Cloud Security		**WEB APPLICATION PROTECTOR PLUS ION**			
			Notes: Web Application Protector plus Ion provides support for one policy which covers all requests on the protected Domain(s). Additional policies are not supported. Web Application Protector (WAP) plus Ion can be ordered in either Mbps or GB. The included amount (Mbps or GB) is based on the plan 'tier' and the Base Fee. The plan includes protection for one Domain. Customer can purchase entitlement to protect additional Domains. Web Application Protector plus Ion includes DDoS Fee Protection, and entitles the customer to 10 GB of NetStorage. HTTPS support with one choice of ALL available SNI-only cert is included EXCEPT "Wildcard SAN SNI". Additional or alternative certificates may be purchased separately. Customers may optionally purchase Site Shield. If sold to protect properties using a separate whole site delivery product, commitments for WAP must match that for the whole site delivery product on the same contract. It is recommended to purchase Additional Domains in blocks instead of single Domains. Ex Calculation: If you need additional 12 domains, Suggested: 1Block of 10 Domains + 2 * 1 Domain)

Akamai	Cloud Security		**KONA SITE DEFENDER (KSD)**			
			Notes: Kona Site Defender can be ordered in either Mbps or GB. Pricing is based on the included usage (Mbps or GB) selected plus the Base Fee. The base fee includes one domain. Customer can add additional domains. Kona Site Defender entitles the customer to five security configurations, with 10 firewall policies and rate policies each. Kona Site Defender also includes one Site Shield map, 10 GB of NetStorage, and HTTPS support with one choice of ALL available SNI-only cert is included EXCEPT "Wildcard SAN SNI". Additional or alternative certificates may be purchased separately. Customers have the option to add additional Security Configurations, Site Shield maps and certificates. Pricing for each additional map is based on a flat fee per additional map. Kona Site Defender includes DDoS Fee Protection with capped burst fee of $0 as incurred per month. If sold to protect properties using a whole site delivery product, commitments for KSD must match that for the whole site delivery product on the same contract. SIEM Integration is available with KSD at a monthly fee. Pricing for Each Additional Security Configuration includes 10 Security Polices and 10 Rate Policies. It is recommended to purchase Additional Domains in blocks instead of single Domains. Ex Calculation: If you need additional 12 domains, Suggested: 1Block of 10 Domains + 2 * 1 Domain)

Akamai	Prolexic		**PROLEXIC ROUTED**			
Akamai	Prolexic		A customer buys a primary Routed for a certain usage tier. Additional Routed can be purchased for a specific usage tier, and usage is aggregated and then overage is assessed at the combined usage tier. The largest Routed must be the primary Routed. Routed usage should be aggregated to one line on the order form. The aggregate Routed usage should have one overage rate on the order form. Included: 1 Subnet Block and 2 Client Border Routers.

			AKAMAI EMERGING SOLUTIONS			
Akamai	IPA		**IP APPLICATION ACCELERATOR**			
Akamai	IPA		An application includes one hostname and one gateway region if needed			
Akamai	IPA		Pricing is based on one of **three billing schemes** and includes one of the three below:			
Akamai	IPA		**preferred**: 100 Concurrent Users / Max 3 mbps 95/5			
Akamai	IPA		**or** 3 Mbps 95/5			
Akamai	IPA		**or** 500 GB delivered			
Akamai	IPA					
Akamai	IPA		**IP Application Accelerator (IPA)** is a product in			
Akamai	IPA		the Application Performance Solutions line that			

MFG	FAMILY	MFG PART	DESCRIPTION	GSA PRICE	GSA SIN CODE	ORIGIN
			NOVEMBER 18, 2020			
Akamai	IPA		provides acceleration for any type of IP based			
Akamai	IPA		application. The solution includes the following			
Akamai	IPA		features:			
Akamai	IPA					
Akamai	IPA		**SureRoute for Performance**: Chooses the most			
Akamai	IPA		effective route between edge and origin servers			
Akamai	IPA		for optimum delivery performance			
Akamai	IPA					
Akamai	IPA		**Transport Protocol Optimization:**			
Akamai	IPA		Tunes the parameters that govern communications			
Akamai	IPA		between Akamai servers, as well as between			
Akamai	IPA		Akamai servers and end users, in order to increase			
Akamai	IPA		the performance of those connections.			
Akamai	IPA					
Akamai	IPA		**Packet Redundancy:** Eliminates the adverse			
Akamai	IPA		effects of packet loss with high availability			
Akamai	IPA		end-to-end connections created with the use of			
Akamai	IPA		redundant paths and forward error correction,			
Akamai	IPA		with specific focus on maintaining low latency			
Akamai	IPA		connections.			
Akamai	IPA					
Akamai	IPA		**SLA Availability:** 100% Network Availability			
Akamai	IPA					
Akamai	IPA		**100% Service Level Agreement:**			
Akamai	IPA		For network availability, as measured by Akamai			
Akamai	IPA					
Akamai	IPA					
Akamai	IPA		**IP Application Accelerator (IPA) Pricing**			
Akamai	IPA		The Base IP Application Accelerator includes 100			
Akamai	IPA		Concurrent Users (CCUs) with peak usage cap of			
Akamai	IPA		3 Mbps. 95/5 Mbps and GB Delivered billing models			
Akamai	IPA		are also available. See pricing below.			
Akamai	IPA					
Akamai	IPA		Fees are per application, each of which serves a			
Akamai	IPA		distinct enterprise purpose and user base.			
Akamai	IPA					
Akamai	IPA		Per-application integration fees continue to apply for			
Akamai	IPA		each incremental application.			
Akamai	IPA					
Akamai	IPA		The following items are also included with the IPA			
Akamai	IPA		solution:			
Akamai	IPA		One Hostname			
Akamai	IPA		One Gateway Region (if needed)			
Akamai	IPA					
Akamai	IPA		**Base Pricing - initial contract**

Akamai	SXL		**SESSION ACCELERATOR**			
Akamai	SXL		**Session Accelerator (SXL)** is a service in Applications Performance			
Akamai	SXL		Solutions line under the Web Application Accelerator (WAA) solution			
Akamai	SXL		that addresses customer requirements for a higher level of security.			
Akamai	SXL		The SXL solution includes the following features:			
Akamai	SXL					
Akamai	SXL		**SureRoute for Performance**: Chooses the most effective			
Akamai	SXL		route between edge and origin servers for optimum delivery			
Akamai	SXL		performance			
Akamai	SXL					
Akamai	SXL		**Transport Protocol Optimization** --- Tunes the			
Akamai	SXL		the parameters that govern communications between			
Akamai	SXL		Akamai servers, as well as between Akamai servers and			
Akamai	SXL		end users, in order to increase the performance of those			
Akamai	SXL		connections.			
Akamai	SXL					
Akamai	SXL		**Packet Redundancy** --- Eliminates the adverse effects of packet			
Akamai	SXL		loss with high availability end-to-end connections created with the use			
Akamai	SXL		of redundant paths and forward error correction, with specific focus			
Akamai	SXL		on maintaining low latency connections.			
Akamai	SXL					
Akamai	SXL		**100% Network Availability SLA**			
Akamai	SXL		**25% Global Performance Improvement SLA**			
Akamai	SXL					
Akamai	SXL		**Session Accelerator (SXL) Fees**			
Akamai	SXL		The preferred pricing model for Session Accelerator includes 5 Mbps.			
Akamai	SXL		Concurrent User and GB Delivered billing models are also available.			
Akamai	SXL		See pricing below.			
Akamai	SXL					
Akamai	SXL		**Note:** Fees are per application, each of which serves a distinct			
Akamai	SXL		enterprise purpose & user base.			
Akamai	SXL		Per-application integration fees continue to apply for each incremental			
Akamai	SXL		application.			
Akamai	SXL					
Akamai	SXL		The following items are included with the Akamai WAA solution:			
Akamai	SXL		One Hostname			

MFG	FAMILY	MFG PART	DESCRIPTION	GSA PRICE	GSA SIN CODE	ORIGIN

Akamai	Data Feeds	100-999.40	**GIO - Global Internet Observer** - monthly fee	$22,165.00	54151ECOM	USA
Akamai	Data Feeds		The GIO visualization tool is an Akamai-hosted application that provides near-real-time Internet-wide situational awareness in three main categories: latency & loss, intrusive/malicious "darknet" packets, and BGP routing. The GIO tool and the related data represent "Limited Rights Data and Restricted Rights Software" as provided in the Data Limited Rights Notice below:			
Akamai	Data Feeds		**GIO AND RELATED DATA LIMITED RIGHTS NOTICE**			
Akamai	Data Feeds		1.1 CERTAIN DEFINITIONS.			
Akamai	Data Feeds		(a) The term "Data" means a feed of observed threat data from Akamai's darknet, a feed of measured ping latencies from the Akamai Intelligent Platform, or a feed of BGP Churn (BGP Updates & Withdrawals) as collected from networks with which Akamai maintains peering sessions.			
Akamai	Data Feeds		(b) The term "Derivative Work" means a work created by Akamai or its affiliates that is based on one or more preexisting works, such as a revision, enhancement, modification, translation, abridgement, condensation, expansion, or any other form in which such preexisting works may be recast, transformed, or adapted, and that, if prepared without authorization of the owner in the copyright in such preexisting work, would constitute a copyright infringement, and specifically shall include any compilation that incorporates such a preexisting work.			
Akamai	Data Feeds		1.2 GRANT OF LICENSE: LIMITATIONS.			
Akamai	Data Feeds		Licensee shall have a non-exclusive, revocable, nontransferable, worldwide, right and license, with no right to sublicense, to use the Data during the Term solely for internal agency purposes. Licensee shall not, for itself, any of its affiliates or any third party, nor allow any third party to: (i) redistribute (including without limitation through resale or sublicense of) the Data in any form whatsoever in whole or in part including to any other governmental agency; (ii) use the Data to provide a commercial service; or (iii) create Derivative Works of any portion of the Data.			
Akamai	Data Feeds		1.3 AKAMAI'S PROPRIETARY RIGHTS TO DATA.			
Akamai	Data Feeds		Akamai retains all of its right, title and interest worldwide in the Data, regardless of the media in which such Data is embodied, now or in the future. Licensee acknowledges that the Data and any material provided by Akamai to Licensee in connection therewith and all information relating thereto, including but not limited to codes, algorithms, data entry and report screens, and any translations, compilations, copies in whole or part and any derivative works based thereon are confidential proprietary information and/or trade secrets of Akamai and its affiliates or are the proprietary property of third parties for which Akamai has obtained distribution rights ("Akamai Proprietary Information"). Licensee shall not in any manner copy or reproduce any portion of the Akamai Proprietary Information, nor disclose Akamai as the source thereof, without the prior written approval of Akamai, which approval may be withheld or conditioned.

Akamai	Shared Services		**READINESS AND RESPONSE SERVICE**			
			Notes: For Readiness and Response Service It is highly recommended that the minimum reviews and hours per product be maintained when buying two or more products. However, for two or more products, the configuration may be reduced as low as 3 reviews/year and 24 hours/quarter at the account teams discretion. In these cases, customer will be subject to overage charges for usage exceeding the total. A discount of 25% may be applied to Readiness and Response Service for any customers with Managed Kona Site Defender Service.

MFG	FAMILY	MFG PART	DESCRIPTION	GSA PRICE	GSA SIN CODE	ORIGIN
			NOVEMBER 18, 2020			
			Notes: A Premium Support unit is defined as including 10 Sites/Apps/Web Exps, 75 Support Advocacy hours per quarter. Additional Premium Support units can be purchased for a smaller fee with 10 sites, application or web experiences and 75 hours per quarter of support advocacy only as included. Note: BOCC is an optional option under Premium Support 2.0. Additional Event purchased for BOCC entitle the customer to up to 1 Million Concurrent Viewers and up to 4 Hours for monitoring. For every Managed Kona contract/order there is a minimum of 5 Threat Update Reviews per year and 25 PS Security Specialist hours per quarter (for 1-5 policies.) For each additional policy 5 PS Security Specialist Hours per quarter are added and 1 Threat Update Review is added. Additional reviews and hours are recommended if a Policy includes coverage for API properties as well as Sites/Applications.

Akamai	Services and Support		**PROTECT AND PERFORM: PREMIUM PLUS SECURITY OPTIMIZATION**			
			Notes: A Premium Support unit is defined as including 10 Sites/Apps/Web Exps, 75 Support Advocacy hours per quarter. Additional Premium Support units can be purchased for a smaller fee with 10 sites, application or web experiences and 75 hours per quarter of support advocacy only as included. Note: BOCC is an optional option under Premium Support 2.0. Additional Event purchased for BOCC entitle the customer to up to 1 Million Concurrent Viewers and up to 4 Hours for monitoring. For Security Optimization Assistance the default configuration includes SOA for KSD. It is also highly recommended that the minimum reviews and hours per product be maintained when buying two or more products, however, for two or more products, configuration may be reduced as low as 3 reviews/year. In these cases, customer will be subject to overage charges for usage exceeding the total. Additional reviews and hours are recommended if a Policy includes coverage for API properties as well as Sites/Applications.

Akamai	Cloud Networking		**Enterprise Application Access - Essentials**			
Akamai	Cloud Networking		Notes: Enterprise Application Access (EAA) is a new approach to access and Identity management. It provides a unique, secure and more convenient alternative to traditional remote access technologies, such as VPNs, RDP and proxies. With Enterprise Application Access, no one can get to applications directly because they are hidden from the Internet and public exposure. A unique cloud architecture closes all inbound firewall ports while providing authenticated end users access to only their specific applications. Enterprise Application Access integrates data path protection, identity access, application security and management visibility and control into a single service. EAA - Essentials is designed for customers who are looking for a simple and cost effective remote access solution that is based on zero trust principles. This solution allows users to get started on the zero trust journey.		54151ECOM	USA

Akamai	Cloud Networking		**Enterprise Threat Protector - Advanced Threat**			
Akamai	Cloud Networking		Notes: ETP Advanced Threat - Enables customers to on-ramp all Web traffic to the Akamai Cloud Proxy as a Secure Web Gateway. In addition to the DNS-based protections of ETP Intelligence, ETP Advanced Threat provides protection against zero-day malware by analyzing traffic in multiple real time engines that process over 100 file types and uses machine learning to find new malware with very low false positive rates. Customers may optionally purchase the Advanced Sandbox module that detects malware with code execution. ETP Advanced Threat integrates with the cusotmer's IDP to support group and user-level Acceptable Use Policies.		54151ECOM	USA

Akamai	Cloud Networking		**Enterprise Threat Protector - Intelligence**			
Akamai	Cloud Networking		Notes: ETP is a cloud-based security service enabling an enterprise to simply and quickly improve its defenses against targeted threats such as phishing, malware, ransomware, and DNS tunneling. It delivers the following customer benefits: Significantly improve security defenses and close DNS security gaps By proactively blocking DNS requests to phishing, malware, ransomware, command and control (C2), and DNS tunnelling domains based on unique and up-to-date threat intelligence.Instantly add protection without complexity or hardware With a 100% cloud-based solution that can be configured and deployed in minutes with no disruption for users and can be rapidly scaled Improve security while reducing management time By managing security from anywhere and deploying policies in seconds to protect all locations Easily improve compliance and enforce your Acceptable Use Policy By blocking access to objectionable or inappropriate domains Improve DNS resilience and performance With Akamai's carrier-grade global intelligent platform		54151ECOM	USA

Akamai	Shared Services		**DDoS Fee Protection *(Limited Availability - Legacy Customer Sale Only)***			
Akamai	Shared Services		1. Pricing tiers are selected based on the average MRR of the combined commit and bursting fees (e.g., service fees) plus modules using the previous three invoices.			
Akamai	Shared Services					
Akamai	Shared Services		2. Customer pays the shown Monthly Charge based on the tier and selected Price Model on a monthly basis.			
Akamai	Shared Services					
Akamai	Shared Services		3. Should an eligible DDoS attack occur, the customer may request a service credit in which the customer pays the Capped Burst Fee in lieu of actual bursting charges, whichever is less.			
Akamai	Shared Services					
Akamai	Shared Services		4. Price is based on the following formulas:			
Akamai	Shared Services		Monthly charge is 10% of the maximum MRR within the selected tier			
Akamai	Shared Services		Capped Burst Fee is 1x the maximum MRR of the selected tier, or 10x the monthly charge.

Akamai	Shared Services		**Note:** The pricing model represented here is recommended but you have the flexibility to use other models as allowed in Momentum for Download Analytics			
Akamai	Media Delivery		**DOWNLOAD DELIVERY (Legacy Customer Sale Only) HTTPS (Shared Cert)**			
Akamai	Media Delivery	**11/1/2018**	**Notes**			
Akamai	Media Delivery		Download Delivery includes 5 GB NetStorage. Additional commitments are priced per unit. If the customer exceeds their commitment, an overage charge is applied. There is no traffic included with media delivery products. HTTPS Shared Cert option is selected by default in the ordering system and must be unselected to explicitly remove HTTPS traffic from the order.

Akamai	DSA		**Dynamic Site Accelerator** ***(Legacy Customer Sale Only)***			
Akamai	DSA		Akamai's DSA improves the speed, scalability, security and reliability			
Akamai	DSA		of any web site that delivers dynamic content and online functionality			
Akamai	DSA		to consumers. Whether it's search queries, shopping carts, account			
Akamai	DSA		maintenance or customer service, Dynamic Site Accelerator ensures			
Akamai	DSA		every transaction is completed with optimal performance for each			
Akamai	DSA		end user.			
Akamai	DSA					
Akamai	DSA		**The Dynamic Site Accelerator Service includes the following:**			
Akamai	DSA					
Akamai	DSA		**SureRoute for Performance**: Chooses the most effective route			
Akamai	DSA		between edge and origin servers for optimum delivery performance.			
Akamai	DSA					
Akamai	DSA		**Prefetching:** Reduces the number of long-haul round trips required			
Akamai	DSA		to retrieve embedded content, eliminating a major source of latency			
Akamai	DSA		for page rendering.			
Akamai	DSA					
Akamai	DSA		**Transport Protocol Optimization:** Tunes the parameters that			
Akamai	DSA		govern communications between Akamai servers, as well as			
Akamai	DSA		between Akamai servers and end users, in order to increase the			
Akamai	DSA		performance of those connections.			
Akamai	DSA					
Akamai	DSA		**Compression:** Compressing content before it is sent to the end-user			
Akamai	DSA		especially effective at reducing transfer times for HTML content to			
Akamai	DSA		users on slower connections; because application pages are often			
Akamai	DSA		light on graphics, this technique can be particularly effective for			
Akamai	DSA		improving performance of transactional content.			
Akamai	DSA					
Akamai	DSA		**DSA Service Level Agreement** includes a 50%/20% Global/North			
Akamai	DSA		America performance improvement and 100% availability.			
Akamai	DSA					
Akamai	DSA		**Site and Visitor Intelligence**: Provides more detailed intelligence for			
Akamai	DSA		the site as well as analytics on the visitors coming to the site like Top			
Akamai	DSA		Site visitors, unique visitors, top URLs etc.			
Akamai	DSA					
Akamai	DSA		**Basic Cache Optimization**: DSA provides a range of cache control			
Akamai	DSA		features that maximizes the cacheability of content including setting			
Akamai	DSA		TTL, modifying headers, path modification and downstream caching.			
Akamai	DSA		(This does not include the Advanced Cache Optimization module			
Akamai	DSA		features --- see below for details.)			
Akamai	DSA					
Akamai	DSA		**Basic Content Availability**: DSA provides controls that increase the			
Akamai	DSA		availability of content when the origin is unresponsive or Internet			
Akamai	DSA		issues block connectivity to the origin server. Serve content from			
Akamai	DSA		cache when origin is unresponsive. The DSA server will serve the			
Akamai	DSA		requested content from cache even if its TTL has expired if the origin			
Akamai	DSA		server is unresponsive.			
Akamai	DSA					
Akamai	DSA		**SureRoute for Failover**: If the path between a DSA server and the			
Akamai	DSA		the origin is blocked, SureRoute for Failover can select a path that			
Akamai	DSA		routes around the blockage so that the origin can always be reached.

Akamai	DSA		**Basic Site Security**: In addition to Akamai's rigorous security that			
Akamai	DSA		protects website infrastructure from attacks, DSD provides			
Akamai	DSA		additional site security features.			
Akamai	DSA					
Akamai	DSA		**Capacity On-Demand**: This feature provides customers ensured			
Akamai	DSA		capacity as needed. Akamai's network intelligence detects when			
Akamai	DSA		traffic is increasing and automatically load balances traffic among			
Akamai	DSA		servers and datacenters that are best suited to service each user.			
Akamai	DSA					
Akamai	DSA		**Dynamic Mapping**: Each end user request is dynamically mapped to			
Akamai	DSA		an Akamai edge server via Akamai's intelligent DNS.			
Akamai	DSA					
Akamai	DSA					
Akamai	DSA		**Included Products for Dynamic Site Accelerator:**			
Akamai	DSA		**On-Demand Streaming ---**			
Akamai	DSA		--- Windows Media --- --- Flash --- Real Media			
Akamai	DSA		**Performance Analytics Site Analyzer (No tokens usage included)**			
Akamai	DSA					
Akamai	DSA		**NOTE:** Advanced Streaming Reporting, Secure Streaming, and Live			
Akamai	DSA		Streaming are not available under DSD. These advanced features			
Akamai	DSA		must be obtained using the AMD order form.			
Akamai	DSA					
Akamai	DSA		**NetStorage (1GB included)**			
Akamai	DSA		--- where delivery of on demand streaming content is captured in the			
Akamai	DSA		200GB/MPV delivery cap.			
Akamai	DSA					
Akamai	DSA		**Dynamic Site Accelerator**			
Akamai	DSA		**DSA Solution Billing Components**			
Akamai	DSA					
Akamai	DSA		DSA solution billing consists of a delivery component, an advanced			
Akamai	DSA		feature module component, and a Site component.			
Akamai	DSA					
Akamai	DSA		**Delivery Component** - The delivery component billing models are			
Akamai	DSA		described in the section below.			
Akamai	DSA					
Akamai	DSA		**Advanced Feature Module Component** - The DSA solution			
Akamai	DSA		advanced feature modules are charged at a flat monthly rate per			
Akamai	DSA		module. Pricing for DSA solution modules is provided in the sections			
Akamai	DSA		below.			
Akamai	DSA					
Akamai	DSA		**Site Component** - DSA Solutions are sold per Site defined as at			
Akamai	DSA		most one domain and up to 10 hostnames. For example, in the case			
Akamai	DSA		of www.customer.com and images.customer.com "customer.com" is			
Akamai	DSA		the domain and "www" and "images" are hostnames. If a customer			
Akamai	DSA		requires more than 10 hostnames or 1 domain then a second Site			
Akamai	DSA		must be purchased. An additional Site pricing schedule is provided			
Akamai	DSA		below.			
Akamai	DSA					
Akamai	DSA					
Akamai	DSA		**Billing Models for the DSA Solutions**			

MFG	FAMILY	MFG PART	DESCRIPTION	GSA PRICE	GSA SIN CODE	ORIGIN
			NOVEMBER 18, 2020			
Akamai	DSA					
Akamai	DSA		**Note:** The standard billing model for Dynamic Site Solutions is million			
Akamai	DSA		page views (MPV). For this purpose, Akamai defines a page view as			
Akamai	DSA		the delivery of a file by Akamai that has Content Type "text/html" but			
Akamai	DSA		excludes redirects (HTTP response code 301/302) and File Not Found			
Akamai	DSA		error page (HTTP response code 404). A content type is an HTTP			
Akamai	DSA		response header that describes the file type that follows, which the			
Akamai	DSA		browser uses to render the content properly.			
Akamai	DSA					
Akamai	DSA					
Akamai	DSA		**Alternative Billing Models for the DSA Solutions**			
Akamai	DSA					
Akamai	DSA		**"95/5 Mbps"** and **"GB Delivered"** billing models are available under			
Akamai	DSA		certain circumstances --- as may be required by some customers.			
Akamai	DSA		Akamai will review & approve these requests, as appropriate.			
Akamai	DSA					
Akamai	DSA					
Akamai	DSA		**Dynamic Site Accelerator Pricing**			
Akamai	DSA					
Akamai	DSA	100-936	**Dynamic Site Accelerator (Legacy Customer Sale Only) DSA Standard Base Monthly Fee** - (incl. 5 MPV or 5 mbps or 1000 GB, one site, and 1 GB NetStorage, 200 Site Analyzer tokens) 300GB of delivery is included per MPV committed or actual usage (whichever is higher)	$5,138.00	54151ECOM	USA
Akamai	DSA					
Akamai	DSA	100-936.1	Dynamic Site Accelerator (Legacy Customer Sale Only) Additional fee charged when customer exceeds the limit of 300 GB per MPV	$2.50	54151ECOM	USA
Akamai	DSA		Committed or Usage, whichever is higher. (Price per GB - Monthly basis)

Akamai	DSD		**Dynamic Site Delivery** ***(Legacy Customer Sale Only)***			
Akamai	DSD		***Includes:*** *On Demand Streaming, Performance Analytics (no tokens), Net Storage (1GB)*			
Akamai	DSD					
Akamai	DSD		**Dynamic Site Delivery** provides a subset of features and			
Akamai	DSD		modules available with Dynamic Site Accelerator. This solution is			
Akamai	DSD		targeted at prospects that don't value dynamic content acceleration			
Akamai	DSD		and don't require advance feature module capability. ***DSD does***			
Akamai	DSD		***not include:***			
Akamai	DSD					
Akamai	DSD		• Acceleration Features: SureRoute, TCP Optimization & Prefetching.			
Akamai	DSD					
Akamai	DSD		• Site and Visitor Intelligence reports, although these reports can be			
Akamai	DSD		purchased as a module – see below.			
Akamai	DSD					
Akamai	DSD		Furthermore, DSD has only a standard SLA:			
Akamai	DSD		• Serve content faster than origin.			
Akamai	DSD		• 100% availability.			
Akamai	DSD					
Akamai	DSD					
Akamai	DSD		**Dynamic Site Delivery provides customers with the following**			
Akamai	DSD		**capabilities and benefits:**			
Akamai	DSD					
Akamai	DSD		**Capacity On-Demand:** Provides customers with ensured			
Akamai	DSD		capacity as needed. Akamai's network intelligence detects			
Akamai	DSD		when traffic is increasing and automatically load balances traffic			
Akamai	DSD		among servers & datacenters that are best suited to service each			
Akamai	DSD		user.			
Akamai	DSD					
Akamai	DSD		**Compression**: Compressing content prior to sending it to end users			
Akamai	DSD		is effective at reducing transfer times for HTML content to control and authentication functionality out to the Edge rather than			
Akamai	DSD		users on slower connections; because application pages are often light on graphics, this technique can be particularly effective for			
Akamai	DSD		light on graphics, this technique can be particularly effective for			
Akamai	DSD		improving performance of transactional content.			
Akamai	DSD					
Akamai	DSD		**Basic Cache Optimization:** DSD provides a wide range of			
Akamai	DSD		cache control features that maximize the cacheability of content			
Akamai	DSD		including setting TTL, modifying headers, path modification, and			
Akamai	DSD		downstream caching. (**Note:** This does not include the "Advanced			
Akamai	DSD		Cache Optimization" module features --- see below for details).			
Akamai	DSD					
Akamai	DSD		**Basic Content Availability:** DSD provides controls that increase			
Akamai	DSD		the availability of content when the origin is unresponsive or Internet			

MFG	FAMILY	MFG PART	DESCRIPTION	GSA PRICE	GSA SIN CODE	ORIGIN
			NOVEMBER 18, 2020			
Akamai	DSD		issues block connectivity to the origin server. The DSD server will			
Akamai	DSD		serve the requested content from cache even if its TTL has expired			
Akamai	DSD		if the origin server is unresponsive.			
Akamai	DSD					
Akamai	DSD					
Akamai	DSD					
Akamai	DSD		**SureRoute for Failover:** If the path between a DSD server and			
Akamai	DSD		the origin is blocked, SureRoute for Failover can select a path that			
Akamai	DSD		routes around the blockage so that the origin can always be reached.			
Akamai	DSD					
Akamai	DSD		**Basic Site Security:** In addition to Akamai's rigorous security that			
Akamai	DSD		protects website infrastructure from attacks, DSD provides additional			
Akamai	DSD		site security features.			
Akamai	DSD					
Akamai	DSD		**Dynamic Mapping:** Each end user request is dynamically mapped to			
Akamai	DSD		an Akamai edge server via Akamai's intelligent DNS.			
Akamai	DSD					
Akamai	DSD					
Akamai	DSD		**Included Products for Dynamic Site Delivery:**			
Akamai	DSD		(The following products are also included with DSD Secure)			
Akamai	DSD		On-Demand Streaming ---			
Akamai	DSD		--- Windows Media			
Akamai	DSD		--- Apple Quick Time			
Akamai	DSD		--- Flash			
Akamai	DSD		--- Real Media			
Akamai	DSD					
Akamai	DSD		**Note:** Advanced Streaming Reporting, Secure Streaming, and Live			
Akamai	DSD		Streaming are not available under DSD. These advanced features			
Akamai	DSD		must be obtained using the AMD order form.			
Akamai	DSD					
Akamai	DSD		**Site Analyzer (No tokens usage included)**			
Akamai	DSD					
Akamai	DSD		**NetStorage (1GB included)**			
Akamai	DSD		--- where delivery of on demand streaming content is captured in the			
Akamai	DSD		200GB/MPV delivery cap with a per GB charge for overage			
Akamai	DSD					
Akamai	DSD					
Akamai	DSD		**DSD Solution Billing Components**			
Akamai	DSD		DSD solution billing consists of a delivery component, an advanced			
Akamai	DSD		feature module component, and a Site component.			
Akamai	DSD					
Akamai	DSD		**Delivery Component** - The delivery component billing models are			
Akamai	DSD		described in the section below.			
Akamai	DSD					
Akamai	DSD					
Akamai	DSD					
Akamai	DSD		**Advanced Feature Module Component** - The DSD solution			
Akamai	DSD		advanced feature modules are charged at a flat monthly rate per			
Akamai	DSD		module. Pricing for DSD solution modules is provided in the sections			

MFG	FAMILY	MFG PART	DESCRIPTION	GSA PRICE	GSA SIN CODE	ORIGIN
			NOVEMBER 18, 2020			
Akamai	DSD		below.			
Akamai	DSD					
Akamai	DSD		**Site Component** - DSD Solutions are sold per Site defined as at			
Akamai	DSD		most one domain and up to 10 hostnames. For example, in the case			
Akamai	DSD		of www.customer.com and images.customer.com "customer.com" is			
Akamai	DSD		the domain and "www" and "images" are hostnames. If a customer			
Akamai	DSD		requires more than 10 hostnames or 1 domain then a second Site			
Akamai	DSD		must be purchased. An additional Site pricing schedule is provided below.			
Akamai	DSD					
Akamai	DSD					
Akamai	DSD		**Billing Models for the DSD Solutions**			
Akamai	DSD		**Note:** The standard billing model for Dynamic Site Solutions is million			
Akamai	DSD		page views (MPV). For this purpose, Akamai defines a page view as			
Akamai	DSD		the delivery of a file by Akamai that has Content Type “text/html” but			
Akamai	DSD		excludes redirects (HTTP response code 301/302) and File Not Found			
Akamai	DSD		error page (HTTP response code 404). A content type is an HTTP			
Akamai	DSD		response header that describes the file type that follows, which the			
Akamai	DSD		**browser uses to render the content properly. 200 GB of delivery is**			
Akamai	DSD		**included per MPB committed or usage, whichever is higher. If the**			
Akamai	DSD		**customer exceeds this limit, a per GB charge is applied.**			
Akamai	DSD					
Akamai	DSD		**Alternative Billing Models for the DSA Solutions**			
Akamai	DSD		**"95/5 Mbps"** and **"GB Delivered"** billing models are available under			
Akamai	DSD		certain circumstances --- as may be required by some customers.			
Akamai	DSD		Akamai will review & approve these requests, as appropriate.			
Akamai	DSD					
Akamai	DSD		DSD is also available with pricing based on monthly Committed Volume			
Akamai	DSD		Rates (CVR) of Gigabytes (GB) of traffic delivered. The base DSD			
Akamai	DSD		solution includes 1,000 GB delivered. Please refer to the pricing (below)			
Akamai	DSD		for additional usage and charges for overage.			
Akamai	DSD					
Akamai	DSD					
Akamai	DSD		**Note:** Additional fees for DSD are per site, defined as a Web site			
Akamai	DSD		requiring separately configured and distinct content delivery services			
Akamai	DSD		deployed on the Akamai platform, reporting feeds, or invoicing. A site is			
Akamai	DSD		a set of URLs, defined by at most one domain name and five hostnames,			
Akamai	DSD		used to deliver content for a discrete and individual application program.			
Akamai	DSD					
Akamai	DSD		Dynamic Site Delivery (DSD) is also available with pricing based on			
Akamai	DSD		Monthly Committed Volume Rates (CVR) of Gigabytes (GB) of traffic			
Akamai	DSD		delivered. The base DSD solution includes 1,000 GB delivered. Please			
Akamai	DSD		refer to the spreadsheet pricing below for additional usage and charges			
Akamai	DSD		for overage.

Akamai	KDD		**Kona DDOS Defender *(Legacy Customer Sale Only)***			
Akamai	KDD	**11/1/2018**	**Notes:**			
Akamai	KDD		Kona DDoS Defender can be ordered in either Mbps or GB. The included amount (Mbps or GB) is based on the plan 'tier' selected for the Base Fee. A minimum of one site or application must be selected. Customer can add any number of sites and/or applications in combination. Kona DDoS Defender also entitles the customer to one Policy and 10 GB of NetStorage. Additional policies may be added as an option. Kona DDOS Defender's default model is Always-On. DDoS Protection capped burst fee is now reduced to $0.

Akamai	Cloud Security		**Kona Site Defender - Cloud Security *(Legacy Customer Sale Only)***			
Akamai	Cloud Security	**11/1/2018**	**Notes:**			
Akamai	Cloud Security		Kona Site Defender can be ordered in either Mbps or GB. Pricing is based on the included usage (Mbps or GB) selected plus the Base Fee. The base fee includes one site OR one application. Customer can add any number of sites and/or applications in combination. Kona Site Defender also entitles the customer to two Policies, one Site Shield map, and 10 GB of NetStorage. Customers have the option to add additional Policies or Site Shield maps. Pricing for each additional map is based on the included usage selected, plus a base fee, per additional map. Kona Site Defender includes DDoS Fee Protection with capped burst fee of $0 as incurred per month. Kona Site Defender can be sold as a standalone security solution without a delivery product. In such cases, the HTTPS Option is required for cases where SSL support is needed. If sold to protect properties using a whole site delivery product, commitments for KSD must match that for the whole site delivery product on the same contract.

Akamai	KSD - Cloud Security		**Kona Site Defender Plans - Cloud Security *(Legacy Customer Sale Only)***			
Akamai	KSD - Cloud Security	***11/1/2018***	**Notes**			
Akamai	KSD - Cloud Security		Kona Site Defender can be orderd in either Mbps or GB. The included amount (Mbps or GB) is based on the plan 'tier' selected for the Base Fee. The plan includes one site OR one application. Customer can add any number of sites and/or applications in combination. Kona Site Defender also entitles the customer to two Policies, one Site Shield map, and 10 GB of NetStorage. Customers have the option to add additional Policies or Site Shield maps. DDos Protection capped burst fee is now reduced to $0.			
Akamai	KSD - Cloud Security

Akamai	Cloud Security		**Web Application Protector *(Legacy Customer Sale Only)***			
Akamai	Cloud Security	**11/1/2018**	**Notes:**			
Akamai	Cloud Security		Web Application Protector (WAP) can be ordered in either Mbps or GB. The included amount (Mbps or GB) is based on the plan 'tier' selected plus the Base Fee. The plan includes one site OR one application. Customer can add any number of sites and/or applications in combination. Web Application Protector also entitles the customer to 5 GB of NetStorage. HTTPS support with one DV SAN SNI certificate is included. Additional or alternative certificates may be purchased separately. Web Application Protector provides support for one policy which covers all requests on the site(s) or application(s). Additional policies are not supported. Customers may optionally purchase Site Shield and DDoS Fee Protection. Web Application Protector can be sold as a standalone security solution without a delivery product. If sold to protect properties using a separate whole site delivery product, commitments for WAP must match that for the whole site delivery product on the same contract.
